Department of Physics Seminar 3-8-22

Year : 2022, Name of the Seminar : Physics
No. of Participants : 36 of climate change
Date : 3-8-22

Activity report :- Under the chairmanship of Prof. Chakradeva Mallick, H.O.D. Physics, the Dept. Seminar was conducted. Four students & staff members of the department kept their opinion on the topic. Samir Kumar Moharana, Lecturer in Physics, Jambeswar Mohavidyalay, Chansang, Balasore joined as resource person.

Abstract :- Warmer ocean temperatures leads to increased evaporation hence, more water vapour in the atmosphere. This is a powerful green house gas. Argued that rising levels of carbon dioxide were responsible for measurable climate change. Physical basis of climate change refers to our understanding of the physical properties weather and climate are driven by the absorption of solar radiation and the subsequent redistribution of that energy through radiatives, advective, and hydrological processes.
