- Abstract -

This Seminar topic is about the origin of English language in India. As the title suggests, it deals with a period that existed in India about four hundred to five hundred years ago. So, this topic involves unearthing lots of data related to the past, its analysis and reaching conclusions thereon. According to historians this country is almost five thousand years old.

In this journey of five thousand years there were many languages that originated and flourished in India. Languages like Sanskrit, Hindi, Bengali, Tamil, Kannada, Punjabi, Odia and Assamese are some of the most popular vernacular languages of India. They originated and survived century after century. Despite the presence and periodical development of these vernacular languages in this country, English is not only originated, became popular, survived and is till now flourishing. All these factors are about the emergence of English language in India.
