Abstract No-1.

Topic:- Conservation of Biodiversity

Date:- 26.10.2018

Venue:- Department of Botany.

Resource Person:- Dr P.K. Dhal, Reader, BNMA, Palak, BDK

Biodiversity is the variability of life on earth. Biodiversity has different parameters to measure like alpha, beta and gamma diversity. Biodiversity is studied under different aspects like species diversity, genetic diversity and ecological diversity. Biodiversity has its significance in different fields like food value, medicinal, industrial, aesthetic, economic, ecological, academic and balances the ecosystem. Biodiversity has under threat due to various reasons like hunting & poaching, habitat loss, urbanization, industrialisation, env. pollution etc.

Keeping in view about their importance and threat every Indian citizen should be conscious to conserve our bio diversity which in return will help them in sustainable utilization and ecosystem development. Conservation of biodiversity is studied under different parameters as prescribed by MOEF, the different acts there in to protect the wild life. The aim of seminar is to acquaint students on conservation procedure and make them aware about the endangered, extinct and going to be extinct species and how to take care of it.
